

Let's Keep Nottingham MOVING

Restoring residents' parking on Abbey Bridge

Work will begin on Monday 15 January for 12 weeks on Abbey Bridge to restore residents' parking and improve cycling facilities at the Abbey Bridge/Gregory Street junction.

What is happening?

Nottingham City Council have listened to concerns from local residents about the loss of parking on Abbey Bridge after the construction of the off road cycle path. To address this, we will be restoring the single yellow line along Abbey Bridge and will provide additional parking spaces on Coleby Avenue. As part of these works, increased capacity will be added to the Gregory Street junction, to improve traffic flow. The cycle facilities will be altered to allow for the parking provision but we will take this opportunity to improve cycle safety at junctions and crossings (see map overleaf).

Works include:

- The outbound cycle path will be moved to the opposite side of Abbey Bridge to make a two-way track
- The parallel pedestrian and cycle crossing near to the junction with Hoyland Avenue will be improved to increase visibility and safety
- The left turn lane at the junction with Gregory Street will become an ahead and left lane to increase capacity
- Four additional parking bays will be created on Coleby Avenue
- The westbound cycle path will be improved at the junction with Gregory Street and the island here widened. This will involve reducing two lanes to one for drivers
- Relocating the bus stop to its original position

How will this affect traffic and residents?

Construction will begin on Monday 15 January for 12 weeks.

- Traffic will continue to operate as normal and we will ensure access is maintained to properties
- A temporary bus stop will be in operation for the duration of the works
- The crossing will be suspended outside the White Hart but alternative pedestrian routes will be available
- Normal working hours will be 8am - 4pm
- There will be lane and road closures at the end of March for resurfacing; these will be carried out overnight or outside of peak hours. Advance warning signs will be in place when exact dates are confirmed
- A signed cycle diversion route will be in place for the duration of the works
